Acknowledgement

Receipt is acknowledged of the Amendment filed July 26, 2005.

Reasons for Allowance

Claims 1-6 and 8-21 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Vishwanthaiah et al., taken alone or in combination of other references, does not teach or fairly suggest a method or an impedance controller that controls termination impedance of at least one output based on a reference value, comprising, among other things, bias adjustment logic that combines a bias amount with said reference impedance control input to provide said termination impedance control input (claim 1); output bias logic that provides an adjustment value and output termination logic that controls said termination impedance control input based on said reference impedance control input and said adjustment value (claim 10); and a step of programming a bias adjust value and controlling a termination impedance input of at least one pull-up impedance generator based on the reference impedance input and the bias adjust value, wherein each pull-up impedance generator is coupled to a corresponding output (claim 17), as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
